Quick Guide to the Responsible Wool Standard (RWS)

The Responsible Wool Standard (RWS) is an industry tool designed to recognize the best practices of farmers, ensuring that wool comes from farms with a progressive approach to managing their land, and from sheep that have been treated responsibly.

As an independent, voluntary standard, companies can choose to become certified to the RWS. On farms, the certification ensures that sheep are treated with respect to their Five Provisions and also ensures best practices in the management and protection of the land. The standard is globally applicable to all breeds of sheep, and mulesing is strictly prohibited.

Objectives
- Ensure that wool does not come from animals that have been subjected to any unnecessary harm.
- Reward and influence the wool industry for strong animal welfare, land management, and social welfare practices.
- Provide robust chain of custody from farm to final product.
- Create an industry benchmark to drive improvements in animal care, land management, and social welfare where needed.

Key Points in the RWS

Protecting Animal Welfare
A holistic approach to animal welfare based around the Five Provisions.

Preserving Land Health
Progressive methods of land management are practiced on RMS farms, protecting soil health, biodiversity and native species.

Protecting Social Welfare
Social welfare, working conditions, and health and safety of workers is addressed.

Credible Certification
A professional, third-party certification body audits each stage in the supply chain.

Chain of Custody
Certification ensures that the identity of the RMS mohair is maintained at all times: from the farm to the final product. Only products with 100% certified mohair may carry the RMS logo.

Stakeholder Engagement
The RMS was developed with the input of farmers, animal welfare experts, land conservation experts, brands and retailers from all parts of the globe.

Adoption of the RWS

There are certified farms in Australia, New Zealand, South Africa, Argentina, Uruguay, and the United States, while supply chain certification exists in several other countries. Visit [http://responsiblewool.org](http://responsiblewool.org) to see all certified organizations.

Brands from across a number of sectors and geographies have made commitments and targets to source RWS-certified wool.

---

Getting Started

The RWS requires all sites to be certified, beginning with the wool farmers and through to the seller in the final business-to-business transaction. Usually, the last stage to be certified is the garment manufacturer or the brand; retailers (business-to-consumers) are not required to be certified.

Farm Scope
Farms are certified to the Animal Welfare, Land Management, and Social Welfare Modules of the RWS.

Processing Scope
Subsequent stages of the supply chain are certified to the Content Claim Standard (CCS) requirements up to the seller in the last business-to-business transaction. Facilities are certified to the standard, and only shipments of goods accompanied by a transaction certificate (TC) are considered certified.

Communicating Claims

- Before labeling products, make sure to follow all requirements in the RWS Logo Use and Claims Guide.
- All claims must be approved by an authorized certification body.

How to Get Certified

1. Select an Approved Certification Body (CB)
   You can find a list of CBs here.

2. Send Application
   We recommend applying with more than one CB to compare estimates.

3. Schedule an Audit
   Good preparation can reduce certification costs by saving auditing time.

4. On-Site Audit
   The CB will send an auditor to conduct an audit against the requirements of the standard.

5. Follow-Up (If Needed)
   If a follow-up is needed, you will be given a corrective action plan to follow.

6. Certification Decision
   Audit results will be reviewed to make a final certification decision.

Background of the RWS

The Responsible Wool Standard (RWS) was developed through an open and transparent process led by Textile Exchange and a multi-stakeholder group which included representatives from across the industry and different sectors, including animal welfare groups, industry organizations, supply chain members, brands, and area experts. All policies and procedures are based on the ISEAL Best Practices, which can be found on our website.

Textile Exchange has been in existence since 2002, and plays a powerful role within the textile industry to support the understanding and use of sustainable materials and proper verification strategies. While Textile Exchange, has extensive experience in standards development and ownership, we do not engage in any certification activities: all of our focus is on supporting the quality and adoption of its standards.

The staff at Textile Exchange are very accessible, and always ready to provide support to brands or companies interested in the RWS.
